

Overview

Blatchcombe is one of six wards in the town of Paignton; with an almost even split of residents between practices in Paignton North (48.7%) and Paignton South (47.2%) zones.

Out of 15 wards, Blatchcombe ranks as the 11th healthiest in Torbay. The level of health and well being has been measured using a combination of health, social and demographic indicators. From of a total of 157 indicators, Blatchcombe had 24 that were significantly *worse or higher* than the England average and 11 that were significantly *better or lower* than the England average, with the remaining 115 not showing any significance.

Blatchcombe Ward

Joint Strategic Needs Assessment

- Over a third of children in Blatchcombe live in poverty.
- The hospital admission rate for Injuries and Poisonings is higher than expected.
- Blatchcombe has a higher than expected level of Pregnancy Terminations.

- Whilst not included in the summary overleaf, Blatchcombe has very high levels of hospital admissions for children with dental problems.

How you can help

Elected members have strong links to local people and understand the needs of the community. They have an opportunity to give a voice to those who are seldom heard but frequently have the greatest need.

- Understand your ward needs.
- Be aware of the overall Torbay picture.
- Use your influence to promote health, wellbeing and independence to reduce inequalities.

Practical activities could include:

1. Engagement with your own community to identify projects that could improve the health and well being of your own ward.
2. Use of Community Partnership meetings to debate and agree projects.

For an assessment of the suitability & sustainability of any potential projects, please forward the proposed details to the relevant Community Partnership – log on to: www.torcom.org.uk to find your Local Community Partnership.

Consider

How might the project impact on, not only this ward, but also on Torbay's health and wellbeing as a whole?

15 indicators have been chosen as the most important for Torbay overall for health related issues. Economic issues have already been highlighted in the ward profiles – available at www.torbay.gov.uk/wardprofiles

A high level summary of 15 of the 157 indicators for Blatchcombe are given overleaf. The indicators are compared against both the England and Torbay averages.

How to interpret:

First look at the circle to see how this ward is doing. This can then be compared to the England average (central vertical line). The best ward in the Bay is to the far right, and the worst ward to the far left. The diamond represents where Torbay as a whole sits compared to the England average. The associated colour coding represents the relative level of statistical significance associated to the indicator, with **green** indicating a significantly 'better or lower' than the England figure, and **red** a significantly 'worse or higher' figure. No colouring shows that there is no statistical significance for that indicator.

Please note that assumptions of 'better or lower' or 'worse or higher' have been made on the basis of an increase or decrease in expected demand for services.

Indicator		Ward Value	Torbay Value	England Value	Blatchcombe
Outcomes	1. Male Life Expectancy	77.7	76.5	76.9	
	2. Female Life Expectancy	84.3	81.7	81.1	
	3. Suicides and undetermined injuries	*	12.3	8.5	
Demography	4. Proportion of population aged 75+	6.6	11.5	7.8	
	5. Proportion of all persons aged 50 and over, living alone	24.4	25.6	24.2	
	6. Child Poverty	35.6	26.1	28.5	
Health status of the population	7. Smoking Prevalence	39.4	26.7	26.0	
	8. Obesity in Children	13.5	12.9	13.2	
	9. Obesity in Adults	21.0	19.4	21.8	
	10. Alcohol related liver disease	127.0	212.4	100.0	
	11. Teenage conceptions	44.4	46.6	41.6	
	12. Pregnancy Conditions (elective)	184.4	195.1	100.0	
	13. Injuries and Poisonings	129.0	128.7	100.0	
Social Context	14. Mental or behavioural disease code for IB / SDA	40.8	43.6	29.3	
	15. IB / SDA benefit claimants	10.6	10.1	7.2
